

**iDiv sabbatical project report**

**“ Ecological networks along altitudinal gradients in the  
Páramos in Venezuela”**

**by “Roxibell Pelayo, Los Andes University”**

**Scientific hosts: Tiffany Knight**

**Feedback:**

My sabbatical stay at iDiv was a wonderful experience. The logistical support for our installation was great and the interaction with the work group as well. It was a year of sharing everyday with people with research interests very similar to mine and this is very inspiring and formative. It was possible to share data, experiences, learn new analysis tools and consolidate new collaborations for the present and the future. This experience allowed me to have a lot of new ideas to continue my work at my institution. I think the best part of the experience is the atmosphere of integration between people from different parts of the world.
